

Aripiprazole Cas no.129722-12-9

Taj Pharmaceuticals.Ltd

Atomoxetine HCl

Cas no.82248-59-7

Generic name	:	Atomoxetine hydrochloride
Chemical name	:	(r)-n-methyl-gamma-(2-methylphenoxy)-benzenepropanamine
Cas no	:	[82248-59-7]
Molecular formula	:	C17h21no. Hcl
Molecular weight	:	291.82
Specification	:	Enterprises standard
Appearance	:	Off-white to white crystalline powder
Assay	:	99%
Use	:	Antidepressant

Atomoxetine HCl is a white to practically white solid, which has a solubility of 27.8 mg/mL in water.

STRATTERA capsules are intended for oral administration only

General Information

Strattera is a selective norepinephine reuptake inhibitor, a new class of treatment that works differently from the other attention-deficit/hyperactivity disorder medications available.

Strattera is not a stimulant under the Controlled Substance Act.

Strattera is an oral capsule and can be taken once or twice a day. Capsules are supplied in 5, 10, 18, 25, 40, and 60-mg strengths.

The safety and effectiveness of Strattera in the treatment of ADHD was established in six randomized, double-blind, placebo-controlled studies in children, adolescents, and adults who met Diagnostic and Statistical Manual 4th edition (DSM-IV) criteria for ADHD.
