

## Desloratadine

Name Desloratadine  
8-Chloro-6,11-dihydro-11-(4-piperidinylidene)-5H-benzo[5,6]cyclohepta[1,2-b]pyridine

Molecular Formula C<sub>19</sub>H<sub>19</sub>ClN<sub>2</sub>

Molecular Weight 310.82 CAS Registry Number 100643-71-8

Desloratadine is an antihistamine that reduces the natural chemical histamine in the body. Histamine can produce symptoms of sneezing, itching, watery eyes, and runny nose.

Desloratadine is used to treat the symptoms of allergies, such as sneezing, watery eyes, and runny nose. It is also used to treat skin hives and itching in people with chronic skin reactions.

Desloratadine may also be used for other purposes not listed in this medication guide.

Before taking desloratadine, tell your doctor if you are allergic to any drugs, or if you have liver or kidney disease.

Do not give this medication to a child younger than 2 years old without the advice of a doctor.

DESLORATADINE is an antihistamine. It helps to relieve sneezing, runny nose, and itchy, watery eyes. This medicine is used to treat or prevent symptoms of allergies. It is also used to treat itchy skin rash and hives.

This medicine may be used for other purposes; ask your health care provider or pharmacist if you have questions.
